PROFILE

Software developer with experience in Python/Django and .NET. Experienced in enterprise application development and migration, REST API implementation, and integration with SQL Server and PostgreSQL. Passionate about solving technical challenges and building scalable software solutions. Currently pursuing a Bachelor's degree in Software Engineering at Universidad Autónoma de Guadalajara.

TECHNICAL SKILLS

Languages C#, Python, JavaScript, Java, C, C++
Frameworks ASP.NET Core, Entity Framework, Django, Django REST Framework, React, Tailwind CSS
Databases Microsoft SQL Server, PostgreSQL, SQLite
Tools Git, Visual Studio 2022, Docker (Basic), Postman, Railway, Linux

PROFESSIONAL EXPERIENCE

Software Developer Intern Jun 2026 – Present
InovenTI

- Contributed to the migration of enterprise applications from .NET Framework to .NET 10, modernizing services, APIs, and core system components.
- Developed new features and maintained enterprise web applications using C#, ASP.NET Core, and Entity Framework.
- Implemented services, controllers, and SQL Server integration through Entity Framework and stored procedures.
- Collaborated on web application, API, and database integration while troubleshooting issues and working in a collaborative Git-based development environment.

Full Stack Developer 2025 – Present
IIOX — SIM Management Platform

- Designed and developed a production-ready SIM management platform featuring authentication, role-based access control, and real-time usage monitoring.
- Integrated the 1NCE API and optimized PostgreSQL databases to support high-performance real-time operations and queries.
- Developed administrative dashboards and management tools for devices and subscription lifecycle management.

PROJECTS

Saltix — University Payroll Management System Python · Django · SQLite github.com/JuanMarcoGosselin/Saltix

- Developed a modular payroll platform covering the complete payroll lifecycle for educational institutions.
- Implemented role-based dashboards with permission management and dedicated operational workflows.

NetVision Studio — Network Monitoring Platform Django · WebSockets · SQLite github.com/FishyOficial/NetVision-Studio

- Implemented a Syslog listener to capture and process real-time network events from physical networking devices.
- Developed a WebSocket-powered monitoring dashboard along with VLAN and subnet management tools.

EDUCATION

Universidad Autónoma de Guadalajara (UAG) Aug 2024 – May 2028
Bachelor's Degree in Software Engineering and Data Mining

Universidad del Valle de Atemajac (UNIVA) Aug 2021 – Jun 2024
Technical Degree in Programming

CERTIFICATIONS

- AI & Data Science: Introduction to Modern AI
- Python Essentials 1
- Python Essentials 2
